Area.—The area of the district has been reduced from 1,659 square miles to 1,651 square miles to accord with the measurement of the Survey carried out in 1897-1904.

Recent Surveys.—The Revision Survey, of which the rates were introduced between 1897-1904, showed an increase in the total culturable area of 33,670 acres. By the revised settlement the total assessment on the Government occupied land was raised by Rs. 88,019 from Rs. 21,67,609 to Rs. 22,55,628, equal to an increase of 4 per cent. The táluka variations are shown below :—

Bárdoli ...	... + 44,192 =	10 per cent.
Bulsár ...	... + 8,087 =	3 „
Chikhli ...	... + 9,169 =	4 „
Chorási ...	... + 19,272 =	11 „
Jalálpur ...	... — 2,803 =	1 „
Mándvi ...	... + 14,878 =	10 „
Olpád ...	... — 13,794 =	3 „
Párdi ...	... + 9,018 =	7 „
Total	... + 88,019 =	4 per cent.

The rates now in force and other details of assessments, dates, etc., are given in Table XV.

The area actually under cultivation in each táluka shown in the Revenue Accounts in 1910-1911 is :—

Táluka.	Area in acres.	
	Cultivated.	Irrigated.
Bárdoli	93,505	690
Bulsár	36,964	1,775
Chikhli	42,054	1,205

Additional Means of Communication and Important Public Works.—The Tápti Valley Railway, which traverses the district for 11 miles, and joins Surat to the Great Indian Peninsula

system at Amalner, was opened in 1898. The capital of the Railway was raised in India, and amounts to Rs. 1,21,09,133. The Kosamba-Zankvav Railway, that runs just beyond the northern border of Olpád and Mándvi Tálukas, was opened in 1911-12. Another narrow-gauge railway is being constructed by the Baroda Durbár from Billimora to Kalamba on the western border of the Dangs. It measures 34·8 miles in length, passes through the Chikhli Táluka and will probably be opened for traffic in 1914. In 1910-11 there were 189 miles of metalled roads and 238 miles of road suitable for fair weather traffic only. The new roads and works of importance constructed since 1875 are as follows :—

Factories.—There are four cotton mills at Surat, containing (1911) 48,544 spindles and 829 looms. The paid-up capital of the four mills is Rs. 19,29,425.

Famine.—In 1899-1900 the rains failed, and the district was partially affected by famine. Of the total area of 1,653 square miles, 1,551 failed to yield a normal crop, the outturn being 77 per cent. of normal. Relief works were opened in December 1899 and continued till October 1902. The highest daily average number relieved on works was 35,951 in July, and in receipt of gratuitous relief, 32,492. The death-rate *per mille* was 74·16. The total number of deaths from all causes among persons on relief works was 1,363, of which 717 were attributed to dysentery and diarrhœa and 331 to cholera. The percentage population of the sexes and children among the relief workers in the district was 47 males, 43 females and 10 children. The average wage per worker unit was Rs. 0-1-8. In 1900-1901 the area affected was 812 square miles, and the population, 241,000 or 38 per cent. of the total. The relief works were closed in the beginning of 1901, but were re-opened in March. The total daily average number on relief works did not exceed 2,000. The death-rate in the year was 41·93 *per mille*. In 1901-1902 the total area affected was 436 square miles, and the population 66,000, or 10 per cent. of the total. Relief works, which were closed in July 1901, were re-opened in February 1902. The highest number in receipt of relief was 2,203 in July. The number in receipt of gratuitous relief was, on an average for the entire period, 108. The death-rate was 35·33 *per mille*. There has been no further famine down to 1910-11. (For other details, see Table No. XIII.)

Plague.—In December 1896 plague appeared in Bulsár town, which suffered severely. Magod, Surat city and Ránder town were subsequently the scenes of epidemic plague. The epidemic spread gradually to the whole district with more or less severity. The total mortality up to the end of March 1911 in the district amounted to over 37,000.

BROACH.

BROACH.

Area.—The area of the district has been increased from 1,458 square miles (1875) to 1,467 square miles to accord with the measurements of the Survey carried out since 1901. The táluka variations are shown below:—

Anklesvar	... ...	+1 square mile.
Jambusar	... ...	+8 „ miles.
	Total ...	+9 square miles.

The area under cultivation in each táluka shown in the revenue accounts in 1910-1911 is:—

Important Public Works.—A new railway connecting the district with the Rájpipla territory at Anklesvar was constructed by the State of *Rájpipla*, and completely opened to traffic in 1899. In 1910-1911 there were 70 miles of metalled road and 186 miles of road suitable for fair weather traffic only. The new roads and works of importance constructed since 1875 are as follows:—

Factories.—There are five cotton mills situated at Broach with (1911) an average of 2,541 hands employed daily, 79,928 spindles and 1,039 looms. The paid-up capital of these mills is Rs. 20,75,815.

Famine.—In 1899-1900 the rains failed, and the district was affected throughout by severe famine. The outturn of crops for the year was estimated at 49 per cent. Relief works were opened in September 1899, and were continued till September 1902, the daily average number being 3,826. In 1899-1900, the highest number relieved was 123,247, and in receipt of gratuitous relief, 72,473. The death-rate *per mille* was 134·91. The total deaths from all causes on relief works were 8,181, of which 3,924 were attributed to diarrhœa and 1,802 to cholera. The percentage proportion among the relief workers in the district was 40 males, 45 females and 15 children. In 1900-1901 the area affected was 267 square miles, and the population 43,000, or 15 per cent. of the total. The highest number in receipt of relief was 5,716 in December 1900, and gratuitously relieved 4,013. The death rate for the year was 64·76 *per mille* in the district. In 1901-1902 the area affected was 703 square miles, and the population 86,000 or 29 per cent. of the total. The total daily average attendance on relief works, which was reduced to 10 in October 1901, again roes to 3,253 in May 1902. The number in receipt of gratuitous relief was a little over 400. The death-rate was 60·45 *per mille*. Since 1901-1902 the district has remained unaffected. (For further details see Table No. XIII.)

Plague.—The first indigenous case of plague occurred in Anklesvar town in April 1898, and to the end of July only 4 more sporadic cases were registered. It assumed epidemic form in the following August and caused 200 deaths. It then spread to some thirteen villages near Anklesvar, and reached Broach town in September. The total mortality up to the end of March 1911 in the district amounted to over 11,000 or 4 per cent. of the total population.
